

To Whom It May Concern,

It is my pleasure to provide this letter of recommendation for the web development company Intoria. The work completed on AGAT Laboratories' website demonstrates their ability to develop highly sophisticated web design with a tri-lingual platform.

Intoria created AGAT Laboratories a custom website with a fully functional Client Master System (CMS) that allows our Marketing Department to have full ability and control to maintain all updates, communications, images, and site map development.

Intoria did an excellent job at building the website to our requirements and fulfilled advanced programming abilities such as content "snippets" which allows our website to pull content from one area in the CMS and apply it to multiple sections in the website, providing user optimization for updating.

Additional features that were custom programmed for our website include the following:

- Locations searching module
- News and Events modules
- Slide shows and image management
- Full menu customization
- User preferences and security
- Form capabilities
- Search bar
- Document management
- Content modules and snippets
- Online search optimization

Working on continuous development of our website with Intoria is always smooth, quick and on budget. The entire team at Intoria is a pleasure to work with and understand our needs.

If our continued partnership with Intoria is an indication of how they can assist your requirements, I believe you will be completely satisfied with their skills and experience.

If I can provide any further information, please do not hesitate to contact me.

Sincerely,

**Amanda Baxter, B.Sc.**

*Marketing Manager*
